

NOMBRE:

FECHA:

A large grid of 20 columns and 15 rows. On the left side, there are three geometric shapes: a staircase-like polygon, a house-like shape with a triangular roof, and a four-pointed star with a square in the center. To the right of these shapes, there are blue dots placed at various grid intersections, forming a pattern that corresponds to the shapes. The dots are arranged in a way that a child can trace the shapes by connecting the dots.
